

# ZVÍŘÁTKA V ZIMĚ

## **Milý kamaráde!**

Nastal zimní čas, venku se brzy stmívá a my lidé trávíme víc času v našich teplých domovech.

Ale co zvířátka v lese ? Jak se jim v zimě daří ?

Pro většinu zvířátek je zima nejtěžším obdobím v roce. Ta, která mohou najít dostatek potravy, v zimě nespí. Nespí většina býložravců jako je jelen, srnec, divoké prase nebo třeba zajíc.

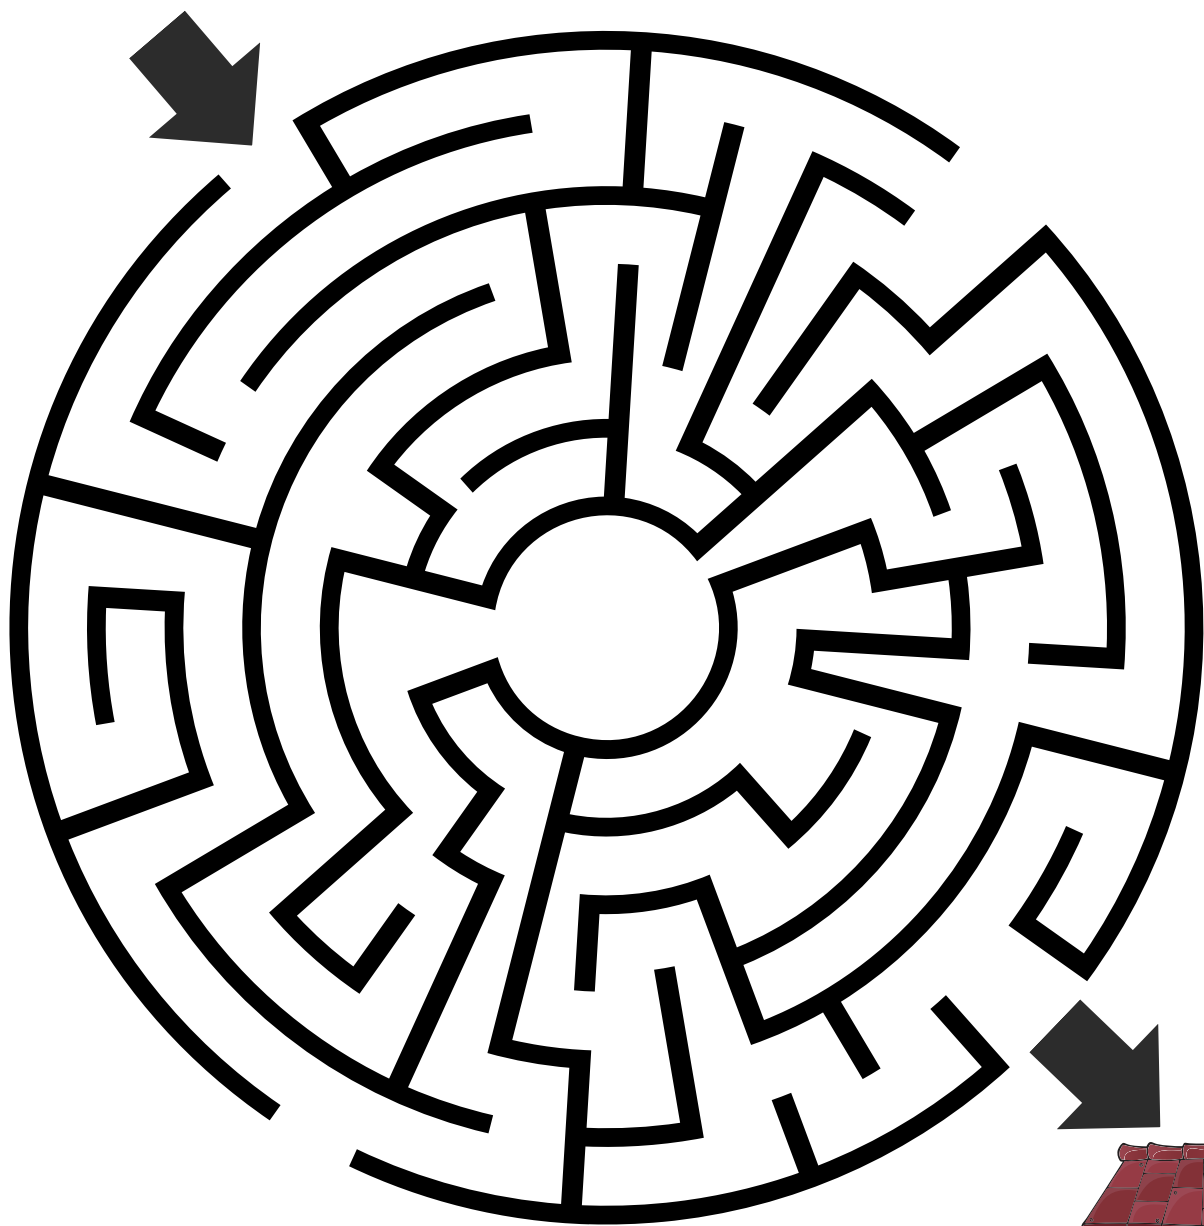

Některá lesní zvířátka ovšem v zimě spí zimním spánkem a kdykoli během zimy se mohou probudit, vylézt z brlohu, najít si něco k snědku a zase spokojeně usnout.

S potravou to nemají vůbec jednoduché, proto jim v tom můžeme pomoci. Víš jak? To ti napoví první úkol. Další úkoly jsou pak pro zpestření dlouhých zimních večerů.

Tak dobrou zábavu.

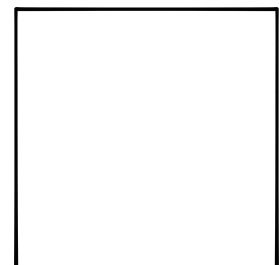

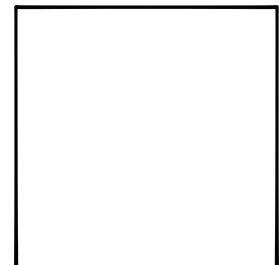

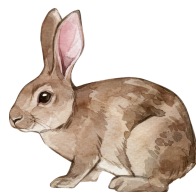

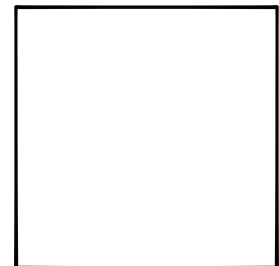

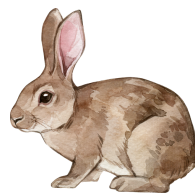

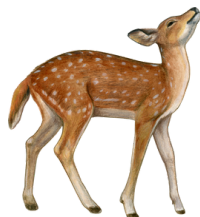

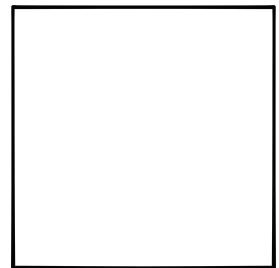

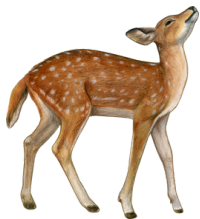

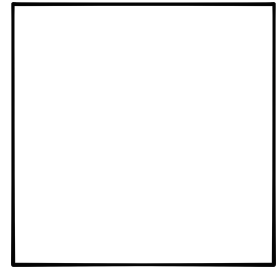

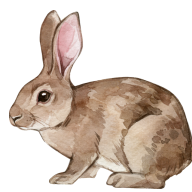

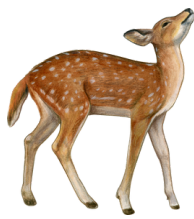

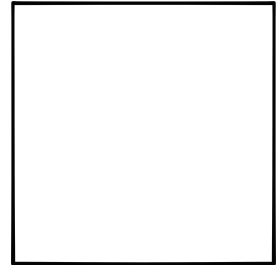

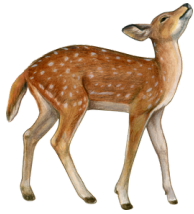

Pomoz Emičce a Kubíkovi.

*Najdi cestu ke krmelci.*

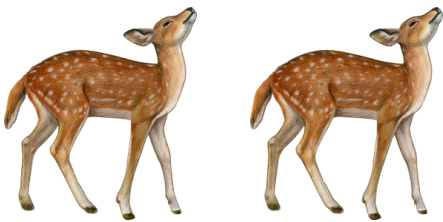

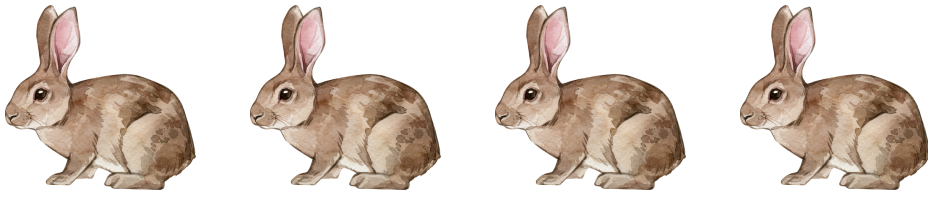

# Co bude v řadě pokračovat?

*Doplň nebo namaluj obrázek, který bude následovat.*

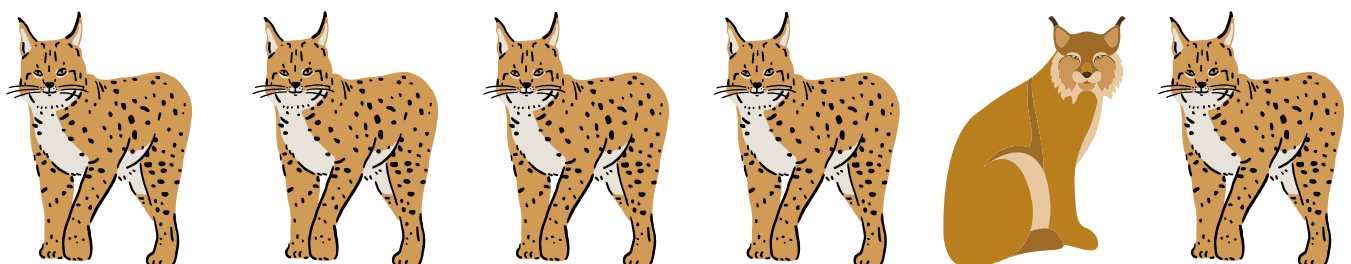

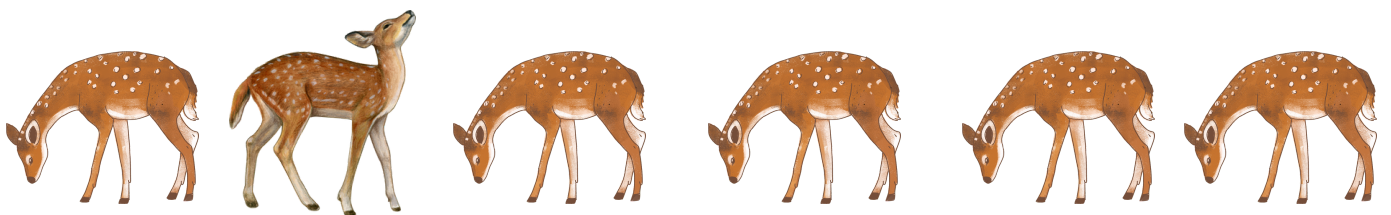

**Zde jsou obrázky k vystřížení a doplnění do řady.**

# Co do řady nepatří?

Vždy jeden obrázek do řady nepatří. Který? Škrtni ho.

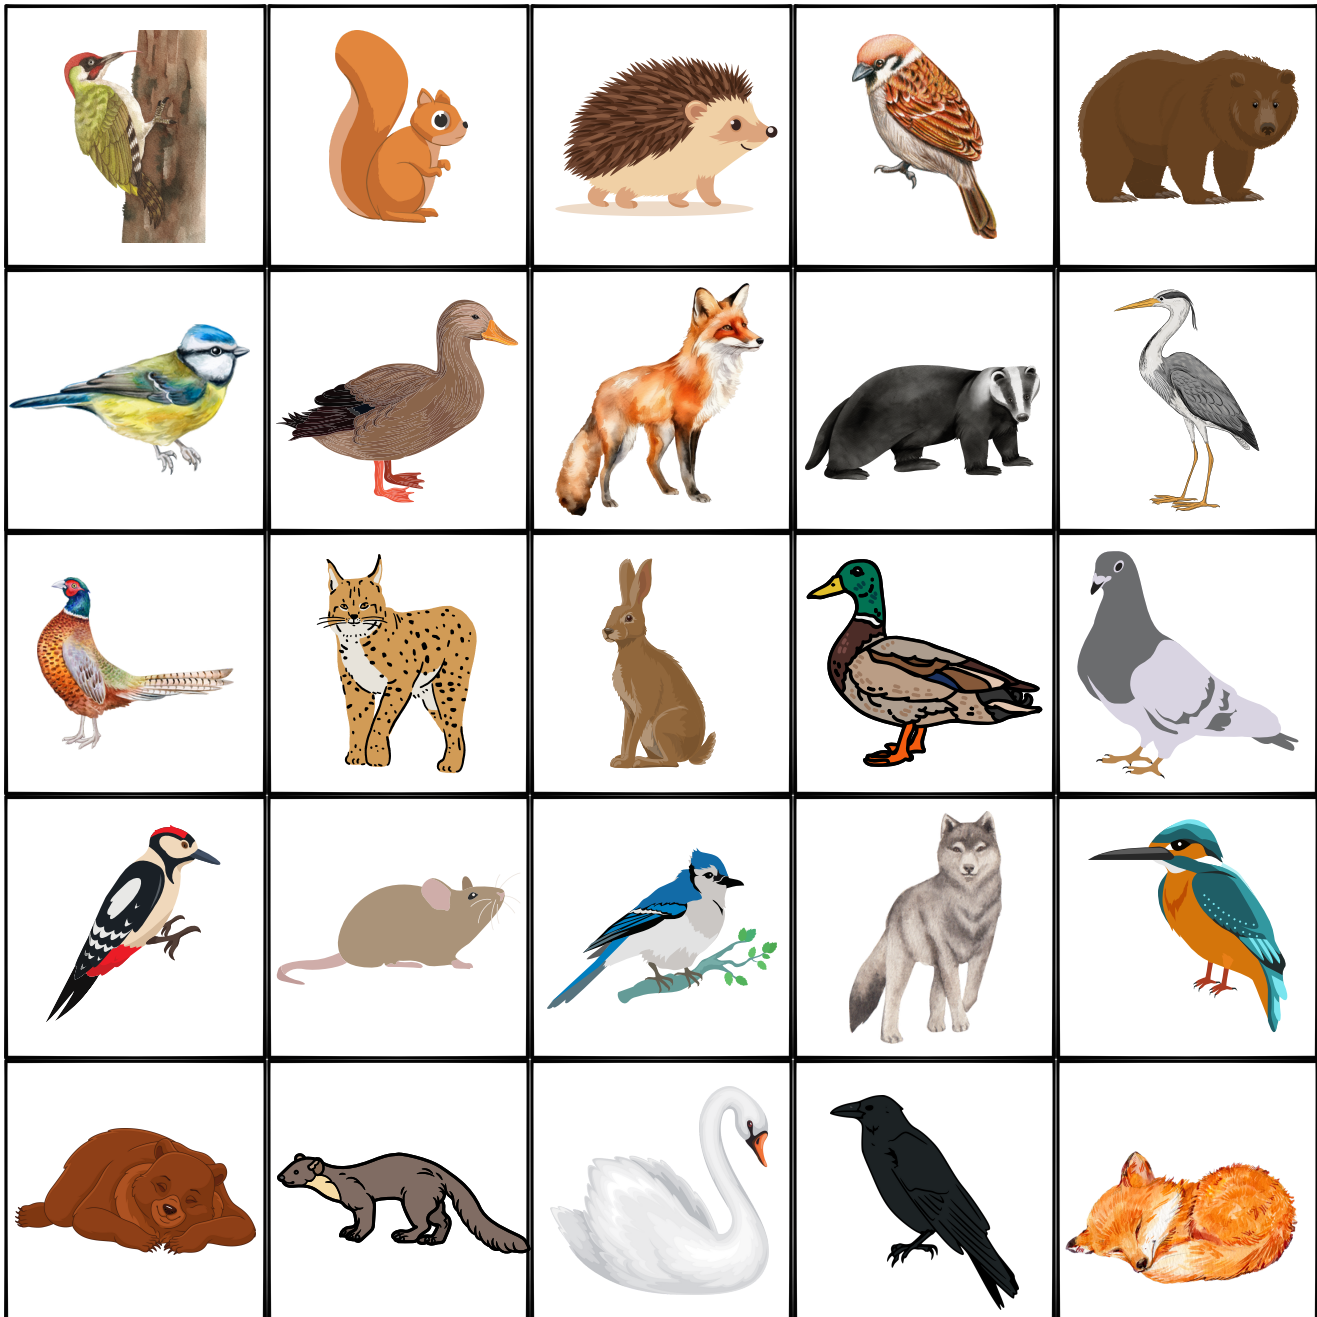

# Šipkovaná

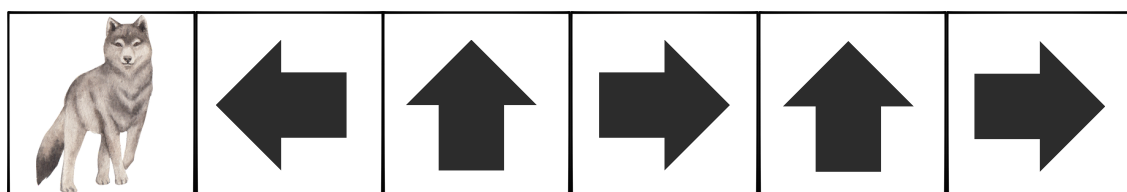

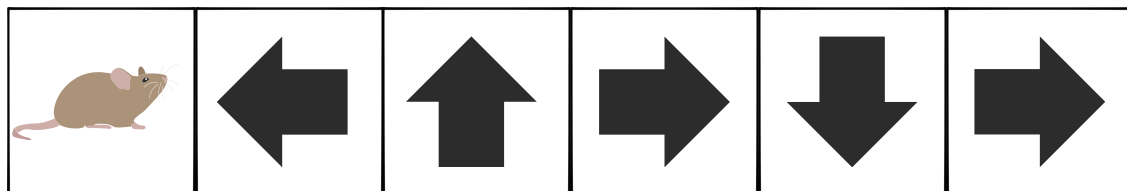

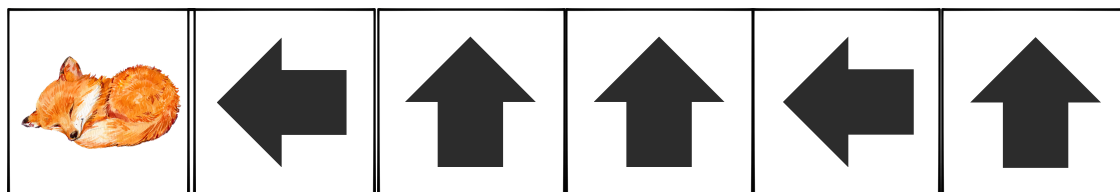

Najdi zvířátko, ke kterému dojdeš podle šipek.
